

BMC TrueSight Intelligence

Empower IT to make faster decisions with real-time, data-driven insight

PRODUCT DESCRIPTION

TrueSight Intelligence is a digital analytics platform that scales to discover, organize, and analyze high volumes of volatile IT operations, service, and business data, providing answers that empower IT operations to make fast, informed decisions that support continuous digital service improvement and innovation.

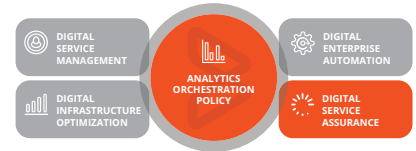

BUSINESS CHALLENGE

In the digital era, applications and services become the backbone of the modern business. These critical technology-driven services are the foundation for business growth, differentiation, and agility. Their strategic importance creates an unprecedented strategic role for IT. However, **traditional IT tools provide a narrow view into individual, dynamic components of the service and generate an overabundance of data that lacks context.** These tools make it difficult for IT to understand and manage the disorganized data, and they limit IT's ability to innovate in alignment with the business.

BMC SOLUTION

TrueSight Intelligence is a cloud-based big data, IT analytics platform that transforms machine, business, and operational data, from virtually any source, into actionable insights, enabling fast, data-driven decisions for digital service improvement and innovation.

Digital Enterprise Management

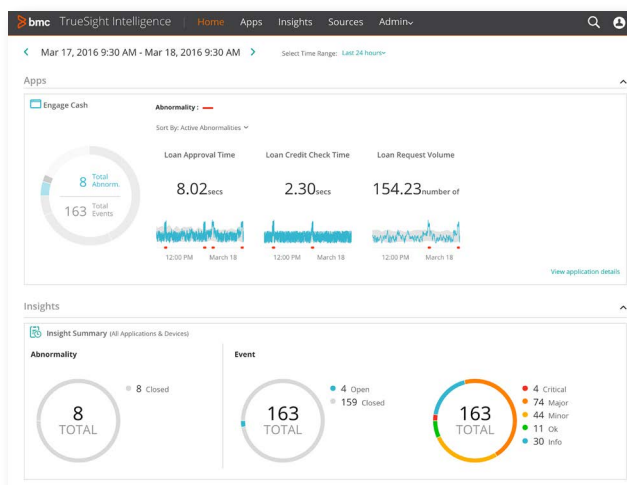

KEY FEATURES

BMC TrueSight Intelligence supports fast, data-driven decisions.

- **Stream and analyze** metric and event data, in real-time, at scale
- **Aggregate** disparate data to understand relationships and patterns
- **Visualize** application and service behavior and detect abnormalities
- **Measure** performance baselines for better production operations

KEY BENEFITS

- **50% faster decisions** based on the right data at the right time in the right context
- **Understand and run IT** in the context of the digital business
- **Uncover new opportunities** by exploring data

- Understand the **health and performance** of your key applications and associated events, at a glance.

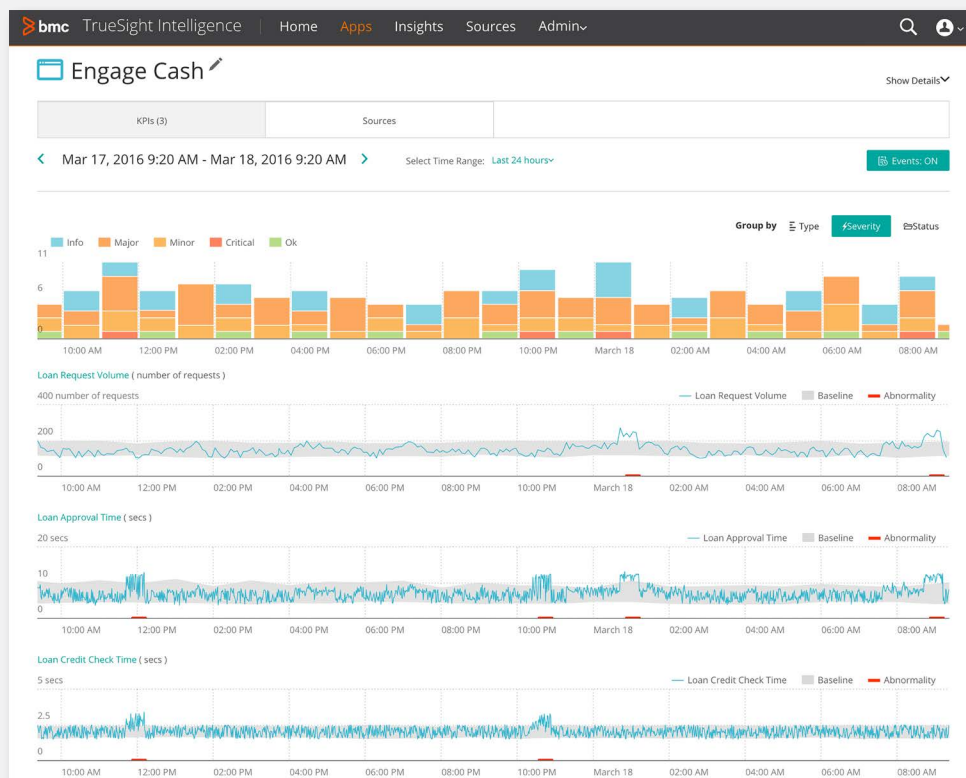

PRODUCT DETAILS

- **Data independent solution**
REST API for time-series & event data PLUS out-of-the-box integration with TrueSight Operations Management & Pulse
- **Visualizes behavior and detects abnormalities**
Automatically learns behavior of any metric: machine data, service desk, business, or external (e.g. social media, traffic, and environmental)
- **Aggregates disparate data to understand relationships and patterns**
Metric-to-metric, event-to-event, metric-to-event
- **Stream and analyze in real-time at scale**
High-volume data capture & analysis, leveraging Apache Storm™, Spark™, Kafka™, and Cassandra™

- **Fast time-to-value, easy to maintain**
Cloud-delivered solution shows results in just a few minutes and eliminates the need to manage any big data infrastructure
